## REACH FOR LIFE

In response to the growing need for engaging and impactful discipleship content, EAGLE Learning recently hosted **REACH FOR LIFE** discipleship training workshop. This was hosted in partnership with AWANA, an international children's ministry organisation that partners with and empowers local churches with leadership trainings and resources to provide an opportunity for all children and youth to be discipled in Christ.

The aim of the workshop was to equip our dedicated mentors with the skills and tools to lead lively, fun-filled and engaging sessions in their respective learning groups. All our mentors have shared challenges in devising compelling discipleship content that resonates with their students. Six learning groups were represented by nine mentors who attended the workshop and were provided a valuable opportunity for collaborative learning and skill development. Our mentors left the training feeling empowered and equipped to enrich their discipleship sessions with dynamic content that captures the hearts and minds of their students.

The enthusiasm and gratitude expressed by the mentors underscored the significance of the workshop in addressing their needs and concerns. As we eagerly anticipate the implementation of these newfound strategies, we are confident that they will bring about positive transformation in our learning groups. We look forward to hearing stories of growth, engagement and spiritual impact as our mentors apply their newly acquired skills to create meaningful discipleship experiences for students. With God's guidance and the dedication of our mentors, we as EAGLE are poised to make a profound difference in the lives of those we serve.

## WHAT OUR TEAM SAYS.....

This month, we asked our staff team what they love about EAGLE. This was their response:

**THAMU MTHUPHA:** "I really appreciate how Eagle incorporates technology into learning. It's impressive how the organisation strives to create opportunities that provide great learning experiences for kids. The innovative approach makes education more engaging and prepares students for the future by integrating modern tools and methods into the curriculum."

**NOKUTHULA MOYO:** "EAGLE has a profoundly positive impact on learners as it has provided a sense of belonging and encouragement while exposing them to e-learning. By incorporating augmented reality (AR) and visual reality (VR), EAGLE has demonstrated a commitment to harnessing the power of technology to enhance the learning experience. It has provided a supportive environment that fosters growth and development."

The discipleship sessions have not only improved communication skills but also empowered learners to take leadership roles, building confidence and self-esteem. By taking turns leading sessions, learners have developed essential skills in public speaking, active listening and effective communication. EAGLE's approach has created a collaborative and inclusive space where learners can thrive, both academically and personally. It's wonderful to see how this initiative has made a positive difference in the lives of learners."

**BRIDGET MOYO:** "I think EAGLE has the potential to truly transform the approach to education and motivate learners to explore beyond the conventional boundaries of text book learning. I love the sense of community in each learning group, it fosters a sense of belonging that many of the young people benefit from."

**MDUDUZI HLABANGANA:** “I am delighted with the impact EAGLE Learning has had on our learners’ educational journeys. Here are the aspects I particularly love and appreciate:

**Interactive platform for clarification:** Learners have been provided with an exceptional platform where they can freely ask questions whenever they encounter difficulties in understanding or comprehending the material. This open communication fosters a supportive learning environment.

**Level platform for relating to learners:** The platform has enabled educators to connect with learners on a level that is both accessible and relatable. This mutual understanding significantly enhances the learning experience.

**Practical quizzes and real-life connections:** For example, I particularly enjoyed a quiz on nutrients that connected academic content to the learners’ daily diets. This practical approach led to some fascinating discoveries and deeper learning.

**Cultural and personal reinforcement:** EAGLE Learning goes beyond academic instruction by reinforcing learners’ identities and roots. This connection to their background enhances both their understanding and appreciation of the material, making learning more meaningful.

**Holistic understanding and application:** Learners have greatly benefited by gaining a deeper understanding of themselves. They are now able to relate their academic learning to their everyday surroundings, creating a more comprehensive and integrated learning experience.

**Growth and development in diverse spheres:** The platform actively engages learners, promoting their growth and development across diverse areas. This holistic approach ensures well-rounded development, preparing them for various life contexts.

Overall, EAGLE Learning has significantly enriched the educational experience for both learners and educators, making learning more interactive, relatable, and meaningful.”
